PROFESSIONAL SUMMARY

Laravel Full-Stack Developer with over three years of practical experience building and maintaining web applications across e-commerce, POS, HRM, LMS, inventory, real estate, and CMS projects. I enjoy turning business requirements into reliable solutions, developing clean REST APIs, improving application performance, and collaborating with designers and teammates. Comfortable working with Laravel, PHP, JavaScript/TypeScript, Next.js, Vue 3, MySQL, and modern development tools.

PROFESSIONAL EXPERIENCE

Full Stack / Laravel Developer — Spinner Tech, Bangladesh

January 2025 – Present

- Develop and maintain E-commerce platforms, POS systems, real-estate management apps, and social-media marketing CMS features for concurrent production clients, using Laravel, PHP, JavaScript/TypeScript, and modern frontends.
- Integrated SSLCommerz payment gateway and Steadfast Courier API, supporting hundreds of daily orders.
- Optimized MySQL queries and implemented Redis caching, improving response time by 45% and reducing server load by 50%.
- Implemented role-based access control (RBAC) and admin workflows across multiple products, enhancing security and usability.
- Diagnosed and resolved production issues, reducing downtime by 70%.

Freelance Laravel Developer — Independent / Contract Projects

February 2024 – December 2024

- Delivered university and personal software projects with a focus on practical, secure application design.
- Built a security guard management application for operational tracking and administration workflows.
- Implemented an NID (National ID) encryption project, emphasizing secure handling of sensitive identity data.
- Developed a money exchange API integration for currency conversion and secure transaction processing.

Full Stack Developer — Web Arts Factory, Bangladesh

March 2023 – February 2024

- Delivered POS systems for retail and business operations and agency websites optimized for conversion and client branding.
- Developed a full Learning Management System (LMS), improving administrative efficiency by 60%.
- Built a bank document management application for structured document workflows, plus a wholesale e-commerce admin panel with integrated inventory management.
- Implemented an EMI management module integrated with the POS system.

SELECTED PROJECTS

Multi-Vendor E-Commerce

[GitHub](#)

Laravel 11, PHP, Blade, Tailwind CSS, Sanctum, MySQL

- Built a marketplace backend with seller portals, commission/payouts, product variants, bulk catalog import, and multi-warehouse shipping.
- Improved operational efficiency by 55% through feature enhancements and workflow automation.

Restaurant POS

[GitHub](#)

Laravel 11, Alpine.js, Tailwind CSS, Reverb, MySQL, Docker

- Built a full restaurant POS with kitchen display, QR ordering, recipe-based BOM stock deduction, and offline PWA sync.
- Reduced order processing time by 40% through workflow and query optimization.

Inventory SaaS

[GitHub](#)

Laravel 13, Next.js, TypeScript, Tailwind CSS, Spatie Permission, MySQL

- Built a multi-tenant inventory ERP with sales/purchasing, double-entry ledger, and role-based access control (RBAC).
- Delivered a Next.js client consuming a Laravel API backend for real-time inventory tracking.

Enterprise HRM

[GitHub](#)

Laravel 13, Blade, Tailwind CSS, jQuery, Vite, MySQL

- Built an HR platform covering payroll/tax, attendance/leave, an ATS careers portal, performance reviews, and audit trails.

School Management System

[GitHub](#)

Laravel 13, Inertia.js, Vue 3, Tailwind CSS, MySQL

- Built a single-school SMS with public site, academics, exams/results, fees, attendance, and bilingual English/Bangla UI.
- Reduced manual administrative tasks by 65% through workflow automation.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript

Backend: Laravel 10/11/12/13, Eloquent ORM, RESTful APIs, Sanctum, Passport

Frontend: Next.js, Vue 3, Inertia.js, Livewire, Alpine.js, Tailwind CSS, Blade

Database: MySQL, PostgreSQL, SQLite, Redis

Integrations: bKash, Nagad, SSLCommerz, Steadfast Courier

Tools & Testing: Git, GitHub, Docker, Vite, Laravel Horizon, Postman, Pest, PHPUnit

DevOps & Deployment: GitHub Actions (CI/CD pipelines), Vercel, Shared Hosting Deployment

Domains: E-commerce, POS, SaaS, HRM, LMS, School Management, Real Estate, CMS

PROFESSIONAL DEVELOPMENT

- Pursuing AWS Certified Cloud Practitioner (Lambda/ECS, RDS, API Gateway, Terraform); building microservices (Docker/Kubernetes, RabbitMQ/Kafka) and growing toward full TDD (Pest/PHPUnit); contributing to open-source Laravel/Vue.js projects.

EDUCATION

B.Sc. in Computer Science & Engineering

Mymensingh Engineering College, Bangladesh | Graduated: 2024
